Tuwowo 1 / 21

Applied Bachelor's student in Informatics Engineering at PENS, focusing on Web Development and Generative AI integration. Experienced in building efficient web applications and passionate about exploring cutting-edge AI implementations to create innovative digital solutions.

Pengalaman Kerja

Dinas Perpustakaan Provinsi Jawa Timur - **Indonesia, Surabaya** Jul 2025 - Nov 2025

Internship - Backend Developer

repo link : https://github.com/Rahdansuwa24/Mapta

- Developed MAPTA, an internship administration web application covering modules from participant registration and placement to certificate issuance. Responsible for
- Designing the system architecture and database (MySQL), as well as building
- Integrating RESTful APIs to enable responsive and structured data exchange.
- Built out the data and reporting infrastructure from the ground up using Tableau and SQL to provide real-time insights into the product marketing funnels and business KPIs

Rumah Sakit Islam Ahmad Yani - **Indonesia, Surabaya** Mar 2026 - Sekarang

PACS Developer - Final Project Partnership

https://github.com/Rahdansuwa24/vismed-PACS

- Developed VISMED, a multi-modal AI inference system, to address real-time AI assistance gaps within traditional PACS workflows and eliminate clinical diagnostic delays.
- Engineered and integrated ONNX microservices and an LLM-powered RAG assistant with Orthanc PACS to automate multi-modal medical image screening, DICOM metadata routing, and anomaly interpretation.
- Accelerated clinical triage and diagnostic workflows by enabling real-time, automated detection of critical pathologies such as Tuberculosis (TB), cardiomegaly, and intracranial hemorrhage.
- Enhanced diagnostic accuracy and reduced human error using transfer lerning and fine tuning by deploying deep learning and vision models to process hybrid medical imaging modalities, including X-Ray, CT-Scan, and ECG.

Politeknik Elektronika Negeri Surabaya - **Indonesia, Surabaya** Jun 2026 - Sekarang

Fullstack Developer - 6th Semester Project

https://github.com/Rahdansuwa24/Eduportal

- Developed EduPortal Pro, a multi-role school management web application using React, Express.js, and PostgreSQL
- Roled Based Access Control (RABC) architecture.
- Features include automated time-bound attendance tracking, curriculum management, 6-semester student grade visual analytics, and AI-driven quiz generation from PDF documents.

Politeknik Elektronika Negeri Surabaya - **Indonesia, Surabaya** Mar 2025 - Jul 2025

Mobile Developer - 4th Semester Project

https://github.com/Rahdansuwa24/mobile-lulusin, https://github.com/Rahdansuwa24/LuLuSin-API

- Developed a mobile-based UTBK-SNBT tryout simulation application using Flutter, featuring various exam sections and a real-time automated scoring system.
- Designed and implemented an intuitive, responsive UI/UX to provide users with a smooth and engaging practice experience.
- Integrated the mobile application with server infrastructure through a RESTful API built with Express.js and Node.js, supporting data management, exam processing, and score calculation.

Politeknik Elektronika Negeri Surabaya - **Indonesia, Surabaya** Aug 2024 - Nov 2024

Backend Developer - 3rd Semester Project

https://github.com/Rahdansuwa24/trash-management

- Developed a role-based waste management web application using Node.js, Express.js, EJS, and MySQL for residents, partners, and administrators.
- Implemented commercial and illegal waste reporting with photo/video uploads, location tracking, and partner matching.
- Built admin and partner dashboards with user management, report handling, account freezing, and device blocking features.

Jenjang Pendidikan

Politeknik Elektronika Negeri Surabaya - **Indonesia, Surabaya** Jul 2026 - Jul 2027 (Perkiraan)

Bachelor of Informatics Engineering, 3.70/4.01

Politeknik Elektronika Negeri Surabaya - **Indonesia, Surabaya** Jul 2023 - Jul 2026

Diploma in Informatics Engineering, 3.72/4.00

- Dengan Pujian Cumlaude

SMAN 2 Surabaya - **Indonesia, Surabaya** Jul 2019 - Jul 2023

Senior High School, 87.80/100.00

Pengalaman organisasi

Himpunan Mahasiswa PENS Sumenep - **Sumenep, Indonesia** Jul 2024 - Jul 2025

Expert Staff of the Social and Community Department

Student organization focusing on the social community environment, such as charity and sharing activities.

Skills, Achievements & Other Experience

- **Achievements** (2026): Achieved a TOEFL score of 453 at the Electronic Engineering Polytechnic Institute of Surabaya.
- **Programming Language**: Python, Java, JavaScript, C, Dart
- **Artificial Intelligence**: Large Language Model (LLM), Retrieval Augmented Generation (RAG), Machine Learning, Deep Learning, Computer Vision, Model Context Protocol (MCP), ONNX Runtime
- **Hardware / IoT**: DICOM & Medical Devices
- **Web / Mobile**: React, Express, Flutter, REST API, Flutter, Tailwind, PostgreSQL, MySQL
- **Tools & Platform**: Git, Docker, Colab, Azure, Firebase, AWS, PACS Orthanc, Linux, Postman, Supabase
- **Soft Skills**: Networking, Problem Solving, Pitching
- **Interest**: Generative AI Automation
